

COMBINED TECHNOLOGY®

Polymer Silvertip
Polymer Silvertip prevents deformation in the magazine.

Lubalox® Exterior Coating:
Reduces fouling, pressure and friction between bullet and bore, providing longer barrel life, easier cleaning and enhanced accuracy.

Look for CT Ballistic Silvertip® bullets in Winchester® Supreme® Ammunition

VARMINT Optimum Performance Velocity:
Minimum: 1600 fps
Maximum: Unlimited

HUNTING Optimum Performance Velocity:
Minimum: 1800 fps
Maximum: 3200 fps

What is Lubalox?

Lubalox® is the trade name Winchester uses to describe a black oxide process. It is a very thin oxide bullet coating, often compared to the bluing on a steel firearm.

What are the benefits of Lubalox?

The primary benefit of Lubalox is reduced barrel fouling. The process creates a surface on the bullet jacket, which increases the amount of shots possible between cleanings. Unlike moly-coated bullets, Lubalox coated bullets leave the barrel residue-free and do not require barrel "seasoning". Additionally, unlike uncoated bullets that tarnish over time, Lubalox protects the surface of the bullet jacket, keeping it looking like new.

Will Lubalox harm the gun barrel?

Lubalox does not harm the barrel. In fact, testing shows that the coating often reduces barrel fouling.

Lubalox coating is not a Moly coating.
